

## Product Data Sheet

PS-001334, Rev. E  
April 2013

# Micro Motion® Certified Marine Bunker Measurement Solution

The Micro Motion® Certified Marine Bunker Measurement Solution from Emerson Process Management combines the power of the Series 3000 platform, the specialized processing of the Marine Bunker Transfer Package, the accuracy of Coriolis meters, and field services to provide transparent, traceable measurement for marine bunker fuel transfer.

OIML/MID compliance is monitored and reported for each transfer. When the appropriate options are purchased, the bunker ticket can be used as a legal document.

### Complete solution for custody transfer of marine heavy fuel oil

- Hardware and software components
- Installation and startup assistance
- Bunker transfer procedures
- System suitable for installation on terminal, barge, or vessel, for use by vendor, customer, or transportation agent

### Certified accuracy and security

- Flow measurement meets OIML R117-1 and MID 2004/22/EC Annex MI-005 requirements
- Security capabilities meet Weights & Measures/custody transfer requirements
- Bunker ticket can be used as legal document

### Powerful user interface and data management

- Monitoring features enable early detection of aeration, erratic flow, or other process problems
- Additional history, trending, and reporting functions available via ProLink® II

# Certified Marine Bunker Measurement Solution

---

**Designed for accuracy and usability.** The Marine Bunker Transfer Package software, running on the Series 3000 transmitter, applies the accuracy and reliability of Coriolis measurement to bunker fuel transfers, and adds specialty features for the marine industry.

Bunker measurement is based on the mass total process variable, which is OIML/MID-approved for bunker transfer of marine fuels when the appropriate options are purchased and the defined Micro Motion bunkering procedures are followed. Due to its immunity to process variation, direct measurement of mass is more accurate than traditional volume measurement.

The Certified Marine Bunker Measurement Solution begins measurement when flow starts and ends measurement when flow stops. New measurement algorithms are optimized for marine bunker fuels. The effects of aeration (air or gas entrainment) are calculated continuously, allowing the operator to take corrective action if required. Automatic alarms are posted if aeration reaches preset limits. At the end of the transfer, the system assesses OIML/MID compliance and reports Pass or Fail.

The Certified Marine Bunker Measurement Solution is shipped with ticket-printing capability. If an MID

option is ordered (recommended), the ticket can be used as a legal document. Other options include a ProLink II interface that supports data collection, trend analysis, and reporting for individual bunkers, and the Smart Meter Verification application.

**Built on the Series 3000 platform.** The powerful Series 3000 platform provides local interface and display capabilities, plus Modbus communications for host or PLC access. Complete configuration, operation, and maintenance functions are available via either method. Security can be implemented via passwords and Weights & Measures hardware/software lockout.

The innovative Series 3000 interface provides complete access to configuration, operation, and maintenance functions via a large, easy-to-use display with big, tactile-feedback pushbuttons. A custom Marine Bunkering dashboard allows operators to manage bunker transfers and monitor fuel delivery, temperature, density, and OIML/MID compliance. At the end of the transfer, the operator can print tickets and/or profile reports. The five most recent transfers are available for review or for duplicate tickets.

# Applications

---

<b>Marine Bunker Transfer Package</b>	<ul style="list-style-type: none"><li>• Meets OIML R117-1 and MID 2004/22/EC Annex MI-005 requirements</li><li>• Custom display (Marine Bunkering dashboard) provides continuous monitoring of quantity transferred (mass total), mass flow rate, and selected variables. Additionally, the system monitors process aeration (air or gas entrainment) against OIML/MID limits. Using the default settings, a medium-aeration alarm is posted when aeration reaches 20% of the limit, and a high-aeration alarm is posted when aeration reaches 75% of the limit.</li><li>• Configurable alarms assist detection of process problems. An integrity breach alarm is available for installations that include an integrity detection loop.</li><li>• At end of bunker transfer, reports transfer data plus OIML/MID pass/fail.</li><li>• Configurable tickets for different levels of detail, such as inventories, gross volume and net volume totals, average temperature, average API density, etc.</li><li>• System can calculate and print “mass in air” data instead of “mass in vacuum.”</li><li>• Bi-directional measurement is available to support installations that will be both loading and unloading fuel (i.e., barges).</li><li>• Four system options:<ul style="list-style-type: none"><li>- Basic: Measure the bunker transfer and print bunker tickets (printing optional)</li><li>- Basic/MID: Measure the bunker transfer and print MID-approved bunker tickets</li><li>- Profile: Measure the bunker transfer and print profile reports and bunker tickets (ticket printing optional)</li><li>- Profile/MID: Measure the bunker transfer and print profile reports and MID-approved bunker tickets</li></ul></li><li>• Supported sensors:<ul style="list-style-type: none"><li>- ELITE® High Capacity Coriolis Meters (CMFHC3M) (approved for use with the Certified Marine Bunker Measurement Solution)</li></ul></li><li>• Requirements:<ul style="list-style-type: none"><li>- Enhanced core processor</li><li>- Weights &amp; Measures application and hardware (automatically included with order)</li><li>- Petroleum measurement application (automatically included with order)</li></ul></li></ul>
<b>Process monitor/totalizer</b>	Process monitoring and totalizing for multiple variables, including mass total (OIML/MID approved for bunker transfer as applicable), mass flow rate, volume flow rate, density, and temperature. All variables are reported in the user's choice of unit. Unit options include all common units, plus the ability to define a special unit for mass or volume. Included automatically.
<b>Weights &amp; Measures</b>	Included automatically with the Certified Marine Bunker Measurement Solution. Provides: <ul style="list-style-type: none"><li>• Physical and software security and lockout capability</li><li>• MID 2004/22/EC compliance, based on OIML recommendation R117-1</li><li>• Security-breach alarm posting</li><li>• MID-approved mass totalizer</li><li>• Audit trail of configuration changes</li><li>• Custom formatting of receipt tickets</li></ul>
<b>Petroleum measurement</b>	Provides process variables such as temperature-corrected volume flow and batch-weighted average density, calculated using the American Petroleum Institute equations. Included automatically with the Certified Marine Bunker Measurement Solution.
<b>Smart Meter Verification</b>	Provides a quick, complete assessment of a Micro Motion Coriolis meter, determining whether the meter has been affected by erosion, corrosion, or other influences affecting meter calibration. No secondary references are required to perform this operation. Meter verification tests can be run manually or automatically, using the built-in scheduler function. The Continue Measurement option enables test execution without interrupting process measurement and reporting. <sup>(1)</sup>

---

(1) Background meter verification (the Continue Measurement option) can be run while the transmitter is secured. For other meter verification options, the transmitter must be unsecured.

# System performance

The Certified Marine Bunker Measurement Solution is engineered to deliver bunkers to 0.5% accuracy under the following conditions:

- A Basic/MID or Profile/MID system is purchased.
- The system is installed according to Micro Motion recommendations.
- Bunker Startup services are provided by a certified technician.
- Micro Motion bunker transfer procedures are followed.
- Flow rate does not exceed 900 mTon/hr.

Basic/MID or Profile/MID system

# Marine Bunker Instruments

---

<b>MID-Approved Printer Option</b>	<ul style="list-style-type: none"><li>Supports MID-approved ticket printing for Basic/MID and Profile/MID systems.</li><li>Includes:<ul style="list-style-type: none"><li>- MID-approved ticket printer (Epson TM-T88V)<sup>(1)</sup></li><li>- MID-approved RS-485 to RS-232 signal converter (KK Systems K2-ADE-TB).<sup>(1)</sup></li></ul></li></ul>
<b>Non-MID-Approved Printer Option</b>	<ul style="list-style-type: none"><li>Supports standard ticket printing (not MID-approved) for Basic and Profile systems.</li><li>Includes:<ul style="list-style-type: none"><li>- Standard ticket printer (Epson TM-U295)<sup>(1)</sup></li><li>- RS-485 to RS-232 signal converter (KK Systems K2-ADE-TB)<sup>(1)</sup></li></ul></li></ul>
<b>Profile Printing Option</b>	<ul style="list-style-type: none"><li>Required for Profile and Profile/MID systems.</li><li>Enables use of RS-485 terminals for communication with both ticket printer and ProLink II. Transmitter automatically detects communication partner and switches as required.</li><li>Factory-assembled Printer Interface Component<sup>(1)</sup> includes:<ul style="list-style-type: none"><li>- NEMA-approved enclosure</li><li>- Factory-mounted relay and terminal block</li><li>- Factory-mounted relay power supply</li></ul></li></ul>
<b>Pressure instrument</b>	<ul style="list-style-type: none"><li>Rosemount Model 3051S (sensor and transmitter). Included automatically with all orders.</li></ul>
<b>Temperature instrument</b>	<ul style="list-style-type: none"><li>Included automatically with all orders. Components:<ul style="list-style-type: none"><li>- Transmitter</li><li>- RTD (sensor)</li></ul></li></ul>
	Approvals option = Z (ATEX)      Rosemount Model 3144P
	Approvals option = U (FM)      Rosemount Model 0065
	Approvals option = U (FM)      Rosemount Model 0068
<b>Check valve</b>	<ul style="list-style-type: none"><li>1-inch industry-standard component. Included automatically if Type option = V (Vessel).</li></ul>
<b>Level switch</b>	<ul style="list-style-type: none"><li>Rosemount Model 2120<ul style="list-style-type: none"><li>- If Orientation option = F (Flag), one level switch is included automatically with order.</li><li>- If Orientation option code = T (Tubes down), two level switches are included automatically with order.</li></ul></li></ul>

---

(1) Must be installed in safe area.

# Micro Motion Bunker Services

---

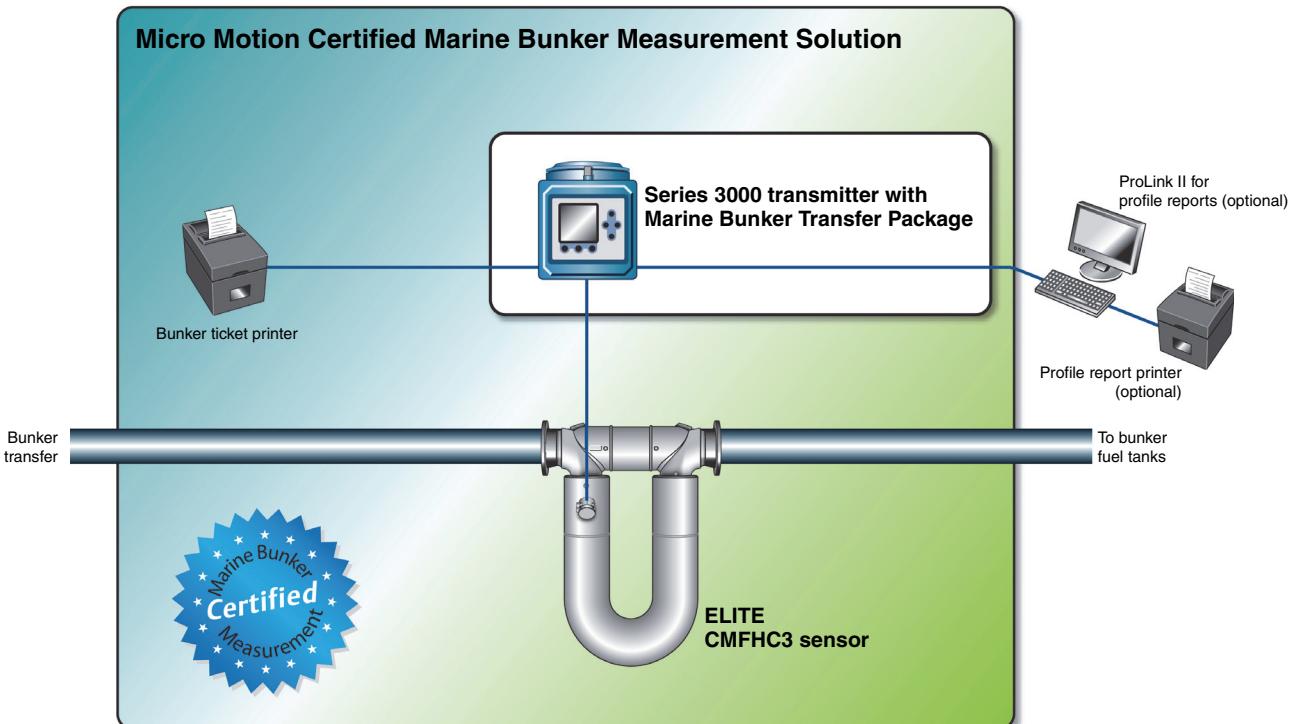

<b>Bunker survey<sup>(1)</sup></b>	One-day site visit, plus preparation and documentation. Includes: <ul style="list-style-type: none"><li>• Review of build drawings and current structure</li><li>• Assessment of installation options</li><li>• Assessment of OIML/MID readiness (if applicable)</li><li>• Development and delivery of installation recommendations and requirements</li></ul>
<b>Bunker startup<sup>(2)</sup></b>	Site visit. <ul style="list-style-type: none"><li>• Transmitter and application configuration</li><li>• System zero</li><li>• Print and communications test</li><li>• Monitoring of first bunker transfer</li><li>• Witness of first ticket printing (if applicable)</li></ul>
<b>Basic systems and Profile systems</b>	<ul style="list-style-type: none"><li>• Transmitter and application configuration</li><li>• System zero</li><li>• Print and communications test</li></ul>
<b>Basic/MID systems and Profile/MID systems</b>	<ul style="list-style-type: none"><li>• System verification according to Measuring Instrument Directive (MID) Module F, performed under Approved Supplier Certificate AS-008, and including:<ul style="list-style-type: none"><li>- Checking of measurement instruments</li><li>- Monitoring of first bunker transfer</li><li>- Witness of first ticket printing</li><li>- Weights &amp; Measures sealing, if system meets requirements</li><li>- NMI Certificate of Conformity</li></ul></li></ul>

---

(1) Must be ordered and completed before product order.

(2) Mechanical and electrical installation must be completed by customer before site visit.

## Typical system

# Housings

---

## Transmitter

<b>Rack-mount</b>	19-inch (486.2 mm) rack-mount housing meets DIN standard 41494 and IEC 297-3 Front panel is rated IP40
<b>Panel-mount</b>	Front panel with bezel is rated NEMA 4X (IP65)
<b>Field-mount</b>	Compartment with threaded cover contains electronics Terminal compartment contains: <ul style="list-style-type: none"><li>Non-intrinsically safe compartment with input/output and power supply terminals</li><li>Intrinsically safe compartment with interface/display, sensor terminals (Model 3700 only), and optional input and output terminals</li></ul> Mounting bracket and interface/display rotate to allow mounting in four different orientations Rated NEMA 4X (IP67)
<b>Sensor</b>	See the product data sheet for your sensor.
<b>Marine Bunker Instruments</b>	See vendor documentation for individual components, or contact Micro Motion.

---

# Interface/display

---

## Transmitter

<b>Display</b>	Backlit LCD, 128 × 128 pixel, bit map Adjustable contrast Non-glare tempered glass lens Suitable for hazardous area installation
<b>Keypad membrane switch</b>	Large push buttons with tactile feedback Software-defined function keys Chemical-resistant polyester
<b>Sensor</b>	N/A
<b>Marine Bunker Instruments</b>	See vendor documentation for individual components, or contact Micro Motion.

---

# Weight

---

## Transmitter

<b>Model 3500</b>	Maximum 3.5 lb (1.6 kg), excluding prepared cables
<b>Model 3700</b>	19 lb (8.6 kg)
<b>Sensor</b>	See the product data sheet for your sensor.
<b>Marine Bunker Instruments</b>	See vendor documentation for individual components, or contact Micro Motion.

---

# Cabling between transmitter and sensor

---

<b>Requirements</b>	Requires standard 4-wire twisted-pair shielded signal cable between the sensor and the transmitter. Micro Motion recommends using Micro Motion 4-wire cable. For Lloyd's Register Type Approval, supplied ferrite bead must be installed on cable.  10 ft (3 m) of 4-wire cable is included with the transmitter. To obtain additional cable, include with purchase order.		
<b>Maximum cable lengths</b>	<b>Cable type</b>	<b>Wire gauge</b>	<b>Maximum length</b>
	Micro Motion 4-wire	Not applicable	1000 feet (300 meters)
	User-supplied 4-wire		
	• Power wires (VDC)	22 AWG (0.35 mm <sup>2</sup> )	300 feet (90 meters)
		20 AWG (0.5 mm <sup>2</sup> )	500 feet (150 meters)
		18 AWG (0.8 mm <sup>2</sup> )	1000 feet (300 meters)
	• Signal wires (RS-485)	22 AWG (0.35 mm <sup>2</sup> ) or larger	1000 feet (300 meters)

---

# Power supply

## Transmitter

<b>AC power supply</b>	85 to 265 VAC 50/60 Hz, 30 VA 0.33 A maximum at 85 VAC, 0.15 A maximum at 265 VAC IEC 127-3/4 fuse, 0.63 A time-delay Complies with European low-voltage directive 2006/95/EC per IEC 61010-1 Installation (Overvoltage) Category II, Pollution Degree 2
<b>DC power supply</b>	18 to 30 VDC 18 watts typical, 25 watts maximum IEC 127-3/4 fuse, 1.6 A time-delay

## Sensor

**Marine Bunker Instruments** See vendor documentation for individual components, or contact Micro Motion.

---

# Electrical connections

---

## Transmitter

<b>Input and output connections</b>	<b>Rack-mount</b>	Type D connectors per DIN standard 41612 (IEC 603-2) Available as solder tails (standard) or screw terminals (optional) Screw terminals accept 24 AWG (0.25 mm <sup>2</sup> ) to 16 AWG (1.5 mm <sup>2</sup> ) wires
	<b>Panel-mount</b>	Screw terminals (standard) or I/O cable with remote DIN rail-mount screw terminals (optional)  Remote terminals attach to any of four rail types. I/O cable is available in lengths of 2, 5, and 10 feet (0.6, 1.5, and 3 meters)  Screw terminals accept 24 AWG (0.25 mm <sup>2</sup> ) to 16 AWG (1.5 mm <sup>2</sup> ) wires
	<b>Field-mount<sup>(1)</sup></b>	Two color-coded wiring compartments: <ul style="list-style-type: none"><li>Compartment with intrinsically safe terminals has two 3/4-inch NPT or M20 × 1.5 conduit openings</li><li>Compartment with non-intrinsically safe terminals has three 3/4-inch NPT or M20 × 1.5 conduit openings</li></ul> Screw terminals accept 22 AWG (0.34 mm <sup>2</sup> ) to 16 AWG (1.5 mm <sup>2</sup> ) wires
<b>Power connection</b>	<b>Rack-mount</b>	Screw terminals are fixed to rack chassis Ground makes first and breaks last  Screw terminals accept 18 AWG (0.75 mm <sup>2</sup> ) to 14 AWG (2.5 mm <sup>2</sup> ) wires
	<b>Panel-mount</b>	Screw terminals accept 18 AWG (0.75 mm <sup>2</sup> ) to 14 AWG (2.5 mm <sup>2</sup> ) wires
	<b>Field-mount<sup>(1)</sup></b>	Screw terminals accept 18 AWG (0.75 mm <sup>2</sup> ) to 12 AWG (4.0 mm <sup>2</sup> ) wires
<b>Sensor</b>	N/A	
<b>Marine Bunker Instruments</b>		See vendor documentation for individual components, or contact Micro Motion.

---

(1) For Lloyd's Register Type Approval (field-mount only), supplied ferrite beads must be installed on I/O wiring and power wiring.

# Input signals

---

## Transmitter

<b>Non-intrinsically safe input signals</b>	One 2-wire frequency/pulse input	Frequency range Minimum pulse width Power Voltage	0–20,000 Hz 25 µ-sec Sourcing or sinking 0–0.8 VDC low state 3–30 VDC high state Nominal 5 mA pull-up
	Two discrete momentary inputs	Pulse width Voltage	0.15 sec minimum 0–0.8 VDC low state 3–30 VDC high state Dry contacts
<b>Intrinsically safe input signals</b>	One 4-wire Coriolis sensor signal input with ground		
<b>Sensor</b>	N/A		
<b>Marine Bunker Instruments</b>	See vendor documentation for individual components, or contact Micro Motion.		

---

# Output signals

---

## Transmitter

<b>Non-intrinsically safe output signals</b>	Two active 4–20 mA outputs	<ul style="list-style-type: none"> <li>Isolated to <math>\pm 50</math> VDC from all other outputs and earth ground.</li> <li>Maximum load limit of 1000 ohms.</li> <li>Output is linear with process from 3.8 to 20.5 mA per NAMUR NE43 (February 2003).</li> </ul>
	Three discrete outputs	Configurable for the application
	Polarity	Active high or active low, software selectable
	Power	Internal pull-up to 24 V
	Voltage	24 VDC nominal
	Current	Sourcing at 5.6 mA when $V_{out} = 3$ VDC Sinking up to 500 mA at 30 VDC maximum
	One 2-wire frequency/pulse output	<ul style="list-style-type: none"> <li>Scalable to 10,000 Hz.</li> <li>Output is linear with flow rate to 12,500 Hz.</li> </ul>
	Pulse width	50% duty cycle above the crossover frequency <sup>(1)</sup> Configurable between 0.543 ms and 277 ms
	Polarity	Active high or active low, software selectable
	Power	Active or passive, software selectable
	Voltage	24 VDC nominal, active 30 VDC applied maximum, passive
	Current	Sourcing at 10 mA at 3 VDC, active Sinking at 500 mA, active or passive
<b>Fault actions</b>	When a fault is detected, outputs go to configured states. User can select upscale, downscale, internal zero, or none. Milliamp outputs conform to NAMUR NE43 (February 2003).	
	Upscale	Milliamp 21 to 24 mA, user configurable
		Frequency 15,000 Hz
	Downscale	Milliamp 1 to 3.6 mA, user configurable
		Frequency 0 Hz
	Internal zero	Drives the mA and frequency outputs for process variables to zero values
	None	Ignores fault conditions
<b>Sensor</b>	N/A	
<b>Marine Bunker Instruments</b>	See vendor documentation for individual components, or contact Micro Motion.	

(1) The crossover frequency depends on the configured value of the pulse width. At the minimum pulse width value of 0.543 ms, the crossover frequency is 922 Hz. At the maximum pulse width value of 277 ms, the crossover frequency is 1.8 Hz.

# Digital communications

---

## Transmitter

**RS-485**

One pair of terminals supports SP (service port) mode or RS-485 mode. On device power-up, the user has 10 seconds to connect in SP mode. After 10 seconds, the terminals switch to RS-485 mode. The communication parameters in SP mode are:

Protocol	Modbus RTU
Data rate	38,400 baud
Parity	No parity
Stop bit	One stop bit
Address	111

In RS-485 mode, the transmitter communicates via Modbus RTU protocol. The communication parameters are configurable with ProLink II software, Modbus, or the display. The shipped default parameters are:

Data rate	9600 baud
Parity	Odd
Stop bit	One stop bit

**Printer port**

The RS-485 port is also used for ticket printing. An internal setting enables automatic switching between printer and communications functions.

Requires RS-485 to RS-232 conversion (included with MID-Approved Printer Option and Non-MID-Approved Printer Option)

Bidirectional features:<sup>(1)</sup>

- Epson TM-U295 printer (Basic and Profile systems): detects and reports “paper out” conditions.
- Epson TM-T88V printer (Basic/MID and Profile/MID systems): detects and reports “printer offline” and “paper out” conditions

**Sensor**

N/A

**Marine Bunker Instruments**

See vendor documentation for individual components, or contact Micro Motion.

---

<sup>(1)</sup> Requires a point-to-point connection. In multidrop configurations, bidirectional communications are not supported.

# Environmental specifications

---

## Transmitter

<b>EMI effects</b>	All Series 3000 devices meet EMC directive 2004/108/EC per EN 61326 Industrial, and all Series 3000 devices conform to NAMUR NE 21 (August 2007).				
<b>Ambient temperature effect</b>	On analog outputs	$\pm 0.005\%$ of span per $^{\circ}\text{C}$			
<b>Ambient temperature limits<sup>(1)</sup></b>	Operating	–4 to +140 $^{\circ}\text{F}$	–20 to +60 $^{\circ}\text{C}$		
	Storage	–40 to +158 $^{\circ}\text{F}$	–40 to +70 $^{\circ}\text{C}$		
<b>Temperature accuracy</b>		$\pm 1.0\text{ }^{\circ}\text{C} \pm 0.5\%$ of reading in $^{\circ}\text{C}$			
<b>Temperature repeatability</b>		$\pm 0.2\text{ }^{\circ}\text{C}$			
<b>Humidity limits</b>	5 to 95% relative humidity, non-condensing at 140 $^{\circ}\text{F}$ (60 $^{\circ}\text{C}$ )				
<b>Vibration limits</b>	Per IEC 68-2-6, endurance sweep, 5 to 2000 Hz, 50 sweep cycles at 1.0 g				
<b>Sensor</b>	See the product data sheet for your sensor.				
<b>Marine Bunker Instruments</b>	See vendor documentation for individual components, or contact Micro Motion.				

---

(1) If exposed to direct sunlight, the ambient temperature can be expected to rise by an additional 50  $^{\circ}\text{F}$  (10  $^{\circ}\text{C}$ ).

# Marine approvals

---

## Transmitters

	American Bureau of Shipping (ABS)	Lloyd's Register North America
Model 3500	Approved	
Model 3700	Approved	Approved <sup>(1)</sup>

## Sensors

ELITE CMFHC3M	Approved	Approved
---------------	----------	----------

---

(1) When Add-on Option LR is ordered (Lloyd's Register Type Approval), supplied ferrite beads must be installed on I/O wiring and power wiring.

# Hazardous area classifications

CSA is a Canadian approvals agency that provides approvals accepted in both the U.S.A. (C-US) and Canada. ATEX is a European directive. FM is a U.S.A. approvals agency and is used for hazardous area approvals on the pressure, temperature, and level switch instruments included with Marine Bunker Instruments.

## Transmitter

<b>CSA</b>	<b>Model 3500</b>	Class I, Div. 2, Groups A, B, C, and D when installed in a suitable enclosure
	<b>Model 3700</b>	Provides non-incendive sensor outputs for use in Class I, Div. 2, Groups A, B, C, and D, or intrinsically safe sensor outputs for use in Class I, Div. 1, Groups C and D; Class II, Div. 1, Groups E, F, and G

(1) Must be ordered and completed before product order.

## Ordering information — Sensor

For detailed sensor information, see the sensor data sheet. Then use the order matrix below to order a sensor that is compatible with the Certified Marine Bunker Measurement Solution. If an option is unspecified here, you can select any of the options available from the sensor data sheet.

Model	Product description
CMFHC3M	High-capacity sensor, approved for use in the Certified Marine Bunker Measurement Solution <sup>(1)</sup>
Code	Process connections
...	
Code	Case options
...	
Code	Electronics interface
3	4-wire stainless steel integral enhanced core processor for remote-mount transmitters
5	4-wire stainless steel integral extended-mount enhanced core processor for remote-mount transmitters
Code	Conduit connections
...	
Code	Approvals
...	
Code	Language
...	
Code	Calibration options
Z	No calibration options
Code	Measurement application software
Z	No measurement application software
Code	Factory options
Z	No factory options
Code	MID calibration options
(blank)	No MID calibration
BB	MID calibration
<b>Typical model number: CMFHC3M 801 N 3 E Z E Z Z Z BB</b>	

(1) CMFHC3A is not available for the Certified Marine Bunker Measurement Solution.

## Ordering information — Transmitter

Order a Model 3500 or Model 3700 transmitter using one of the following order matrices. Do not use the order matrix in the Series 3000 data sheet.

### Model 3500

Model	Product description
3500	Micro Motion Coriolis multivariable transmitter; remote rack/panel-mount
Code	Mounting options
R	DIN rack
P	Panel-mount
Code	Power supply options
1	85 to 265 VAC
2	18 to 30 VDC (recommended for 24 VDC users)
Code	Remote core processor
A	None
Code	Additional hardware modules
3	Marine bunker hardware
Code	Sensor interface
5	4-wire interface to sensors with core processors
Code	Terminals
B	Screw terminals
C	Prepared cables; 2 foot (0.6 m) length (use with mounting code P only)
D	Prepared cables; 5 foot (1.5 m) length (use with mounting code P only)
E	Prepared cables; 10 foot (3 m) length (use with mounting code P only)
Code	Relays and housings
1	No relays and housing
Code	Approvals
M	Micro Motion standard (no approval)
C	CSA (Canada only)
A	CSA C-US (U.S.A. and Canada)
B	ATEX — Safe area with IS sensor outputs
P <sup>(1)</sup>	NEPSI — Safe area
Continued on next page	

(1) Available only with language option M (Chinese).

## Ordering information — ProLink II

See the product data sheet for ProLink II.

## Ordering information — Micro Motion Bunker Services

<b>Model</b>	<b>Description</b>
MMIYMABBZZZ	Bunker survey.
MMIYMABZBZZD	Bunker startup. Includes OIML/MID verification and Weights & Measures sealing.
MMIYMABZBZZW	Bunker startup. No OIML/MID verification or Weights & Measures sealing.

## Sample purchase orders

### Basic system with ticket printer

Line item	Model code or part number
1 Sensor	CMFHC3M 801 N 3 E Z E Z Z Z
2 Transmitter	3700 A 1 A 3 5 A Z E H Z Z
3 Marine Bunker Instruments	MBIVT3ZZ2ZZ
4 Bunker survey	MMIYMABBZZZ
5 Bunker startup	MMIYMABZBZZW
6 Additional 4-wire cable (1000 ft [300 m])	CMVDSZZ01K

### Basic/MID system with ticket printer

Line item	Model code or part number
1 Sensor	CMFHC3M 801 N 3 E Z E Z Z Z BB
2 Transmitter	3700 A 1 A 3 5 A Z E H Z Z
3 Marine Bunker Instruments	MBIVT3ZZ4ZZ
4 MID-specific bunker survey	MMIYMABBZZZ
5 MID-specific bunker startup	MMIYMABZBZZD
6 Additional 4-wire cable (1000 ft [300 m])	CMVDSZZ01K

### Profile system with ticket printer

Line item	Model code or part number
1 Sensor	CMFHC3M 801 N 3 E Z E Z Z Z
2 Transmitter	3700 A 1 A 3 5 A Z E H Z Z
3 Marine Bunker Instruments	MBIVT3ZP2ZZ
4 ProLink II	PLK0UEF
5 Bunker survey	MMIYMABBZZZ
6 Bunker startup	MMIYMABZBZZW
7 Additional 4-wire cable (1000 ft [300 m])	CMVDSZZ01K

### Profile/MID system with ticket printer and Lloyd's Register Approval

Line item	Model code or part number
1 Sensor	CMFHC3M 801 N 3 E Z E Z Z Z BB
2 Transmitter	3700 A 1 A 3 5 A Z E H Z Z LR
3 Marine Bunker Instruments	MBIVT3ZP4ZZ
4 ProLink II	PLK0UEF
5 MID-specific bunker survey	MMIYMABBZZZ
6 MID-specific bunker startup	MMIYMABZBZZD
7 Additional 4-wire cable (1000 ft [300 m])	CMVDSZZ01K

# Micro Motion—The undisputed leader in flow and density measurement

World-leading Micro Motion measurement solutions from Emerson Process Management deliver what you need most:

## Technology leadership

Micro Motion introduced the first reliable Coriolis meter in 1977. Since that time, our ongoing product development has enabled us to provide the highest performing measurement devices available.

## Product breadth

From compact, drainable process control to high flow rate fiscal transfer—look no further than Micro Motion for the widest range of measurement solutions.

## Unparalleled value

Benefit from expert phone, field, and application service and support made possible by more than 750,000 meters installed worldwide and over 30 years of flow and density measurement experience.
